

Project Title:

Smart Bakery System.

Programming Language:

Java

The smart bakery system is java-based system designed to manage bakery sales and inventory through simple menu options etc. It has two types of users a **Admin** and a **Customer**. The system helps admin to manage the inventory by verifying his identity and updating the products, their prices and stock. Also, it has an option to change the Admin interface login credentials. The System helps another user which is customer to see the current and latest main menu with Product name, its price and quantity available then ask him to enter his choices and then add all these choices to cart and print the total bill.

The System includes following features:

- Allow Admin user to update the products, prices and stock.
- Allow Customer to select his choices with quantities.
- Allow Admin to change the products' prices and stock, also add a new product.
- Generate the total bill of Customer with current time and date.
- Use of all the topics including Arrays, If/else, Operators, Loops, Exceptional Handling and File Handling.
- All the data about products stored in file "Products.txt" and data related to Admin login credentials stored in file "Credentials"

Outputs:

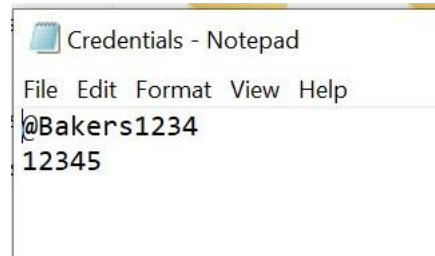

First of all, we selected option 1 and enter wrong credentials as in file the credentials are different.

```
run:
===Welcome to New Fresh Bake===
  1. Admin Portal
  2. Customer
  3.Exit
Select your choice: 1
Username: @Bakers1234
Password: 1234
Invalid credentials!
===Welcome to New Fresh Bake===
  1. Admin Portal
  2. Customer
  3.Exit
```

Then we entered the correct credentials then the program allowed us to enter the functioning of admin.

```
===Welcome to New Fresh Bake===
  1. Admin Portal
  2. Customer
  3.Exit
Select your choice: 1
Username: Bakers1234
Password: 1234
=====Admin Portal=====
  1. Change Credentials
  2. Manage Inventory
Make your choice: 1
New Username:@Bakers1234
New Password:12345
===Welcome to New Fresh Bake===
  1. Admin Portal
  2. Customer
  3.Exit
```

Then we changed the login credentials as shown in fig and file pics is given below after update:

Then we select option 2 in next turn and updated the prices and stock one by one as shown in fig before the update the main menu and after it is different:

```
Username: @Bakers1234
Password: 12345
=====Admin Portal=====
1. Change Credentials
2. Manage Inventory
Make your choice: 2
```

```
---Inventory Management---
1. Update Prices.
2. Update Stock.
3. Add new product.
Your Choice: 1
```

```
-----Products Menu-----
```

No.	Name	Price (Rs)	Quantity
1	Cake	90	8
2	Samosa	50	40
3	CupCake	50	21
4	Bread	170	57
5	Patties	110	43
6	Pizza	550	24
7	RasGulla	800	24
8	Barfi	900	32
9	CreamRoll	70	49
10	Cookies	50	35
11	Halwa	350	18

```
Enter the index of product you want to update(0 to stop): 1
```

```
New price for Cake: 100
```

```
Enter the index of product you want to update(0 to stop): 0
```

```
Prices updated Successfully!
```

Then we again updated the stock now the price in main menu is updated as shown in fig:

2. Update Stock.
3. Add new product.
Your Choice: 2

-----Products Menu-----

No.	Name	Price (Rs)	Quantity
1	Cake	100	8
2	Samosa	50	40
3	CupCake	50	21
4	Bread	170	57
5	Patties	110	43
6	Pizza	550	24
7	RasGulla	800	24
8	Barfi	900	32
9	CreamRoll	70	49
10	Cookies	50	35
11	Halwa	350	18

Enter the product index to add stock(0 to stop): 1
Qunatity of Cake to add: 2
Stock of Cake updated!

Now we select the customer option and here you can see the fully updated main menu of cake price and quantity:

===Welcome to New Fresh Bake===

1. Admin Portal
2. Customer
- 3.Exit

Select your choice: 2

-----Products Menu-----

No.	Name	Price (Rs)	Quantity
1	Cake	100	10
2	Samosa	50	40
3	CupCake	50	21
4	Bread	170	57
5	Patties	110	43
6	Pizza	550	24
7	RasGulla	800	24
8	Barfi	900	32
9	CreamRoll	70	49
10	Cookies	50	35
11	Halwa	350	18

Select Product to add(0 for checkout): 1
Qunatity you want to buy: 2
Select Product to add(0 for checkout): 2
Qunatity you want to buy: 5
Select Product to add(0 for checkout): 0

After checking out the total bill is printed, and we exited the program:

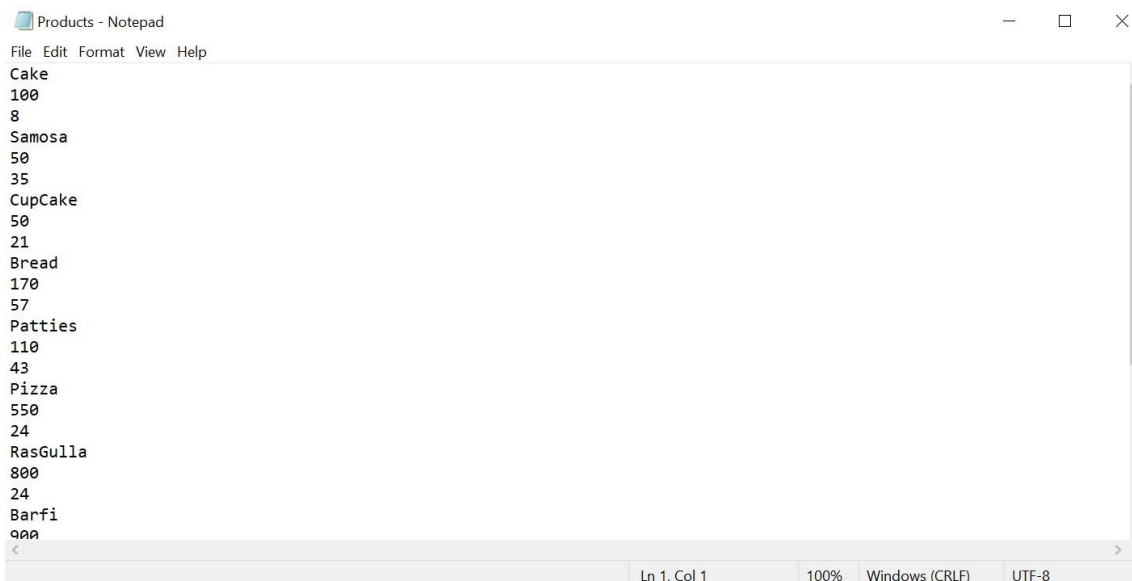

```
=====Customer Receipt: New Fresh Bake=====

Date & Time: 2025-06-13T20:31:20.155282400
items           price      qty      SubTotal
-----
Cake            Rs.100      2        Rs.200
Samosa          Rs.50       5        Rs.250
=====

                        Total Payable Amount = 450
-----Thanks For Shopping-----
=====

===Welcome to New Fresh Bake===
    1. Admin Portal
    2. Customer
    3.Exit
Select your choice: 3
Thanks for visiting! GoodBye.
BUILD SUCCESSFUL (total time: 3 minutes 22 seconds)
```

The file of products is given below:
